

Circulatory System

Name: _____

Period: _____

Date: _____

What does it do for us?

Our circulatory system...

- Delivers necessary materials (like _____) to the entire body in the _____,
- Removes _____ from cells, and helps fight _____ by transporting _____ cells in the blood.

What carries the blood?

- _____ are the hollow tubes that carry your blood around your body.
- There are 3 TYPES:
 - _____
 - _____
 - _____

What is blood?

_____ carry oxygen
_____ fight disease
_____ form blood clots to stop you from bleeding too much.

So what happens if you don't take care of your circulatory system?

Schoolhouse Rock –

What did you learn? _____

Label the parts of the heart ONTO THE PICTURE listed below. Write the NUMBER with the correct label in the word bank. After labeling the heart, please DRAW ARROWS showing the flow of blood through the heart. The final step will be to COLOR IN showing the type of blood (oxygen-rich or oxygen-poor). Feel free to use your own color choices, but be clear as to what color represents oxygen-rich and which represents oxygen-poor.

- Right atrium Right ventricle Septum Superior Vena Cava Pulmonary Artery
 Left atrium Left ventricle Aorta Inferior Vena Cava Pulmonary Vein

Oxygen – rich blood = _____
 Oxygen – poor blood = _____
